Pattern Test Square: Printer Check

US Letter

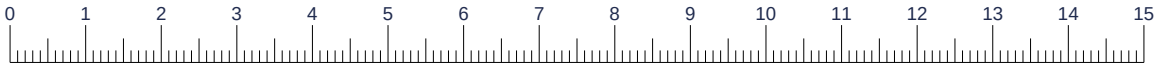

Print this page at 100% and measure it to check your printer and print settings

1. Save the PDF and open it in Adobe Acrobat Reader or another full PDF reader. Browser and phone print dialogs may hide the scaling options.
2. In the print dialog choose Actual size or Custom scale 100%. Turn off Fit, Shrink oversized pages and Scale to fit. Names vary by program and printer driver, so check the preview.
3. Print this test page once and measure each square in both directions, edge line to edge line, with a rigid ruler.
4. If a side does not match its label, fix the scale setting and print again. If the same error repeats at 100%, custom scale = label size / measured size x 100 (10 cm printed as 9.8 cm: 102%).

6 in, 1/8 in marks

15 cm, 1 mm marks

1 in square measured: ____ 10 cm square measured: ____ Printer and setting: ____

What this page can and cannot check

This page checks your printer and print settings. It cannot verify the scale of a different pattern file, which may use another paper size, page box or print preset. When a pattern has its own test square, print and measure that one too before printing the remaining pages.
